

Special session at the

**ERSA** – European Regional Science Association, 50<sup>th</sup> Congress in Jönköping Sweden  
**19-22 August 2010**

## **Productivity effects of regional infrastructure investment**

Research on the contribution of the infrastructure to private output at the regional level has been ongoing during the last two decades. The interest in the economic consequences of investment in infrastructure has been renewed both among academics and policy-makers. For this special session, regional infrastructure is understood as a broad concept including not only regional transport system but also educational infrastructure and the regional knowledge creation base in general. Empirical and theoretical research on the productivity effects of regional infrastructure investment at either the regional or the micro level are particularly invited.

### **Deadlines and information:**

Abstract submission deadline: **January 15, 2010.**

Full paper submission deadline: **June 1, 2010.**

Please submit contributions to: [Andreas.Stephan@ihh.hj.se](mailto:Andreas.Stephan@ihh.hj.se)
